DESIGN IS A TEAM SPORT

To think and design in a sustainable way. That is both what I most admire in my peers' work and my current state of mind!

Fascinated by sustainable design new solutions and managing the design processes, I find myself constantly learning. The last few years, I've been focusing on circular economic systems and new technologies to improve results in community living and working environments. I wish I could have thought of designing the Bosco Verticale, in Milano, Italia!

Switzerland, Italia, Brazil … the World is full of wonderful places where I feel free and well!

I am Italian through my love of art, creativity, curiosity and immense respect for the power of art and design. Psst... Elegant clothes boost my inspiration!

I am Brazilian through my love of nature and search for sustainability, as well as my sensual and poetic attraction to music and dance!

Bauhaus all the way! Form follows function. Period.
